eBRAM Deal-Making Portal

Augment Your Visibility With eBRAM

FREE SUBSCRIPTION TO E-DIRECTORY

WHY CHOOSE US?

eBRAM is a not-for-profit organisation, a LawTech service provider and an online dispute resolution institution.

Unlike other online deal source platforms, eBRAM's Deal-making Portal is tailor-made to address the challenges of launching a cross-border transaction, especially for SMEs and MSMEs and, at the same time, promote dispute avoidance.

OUR PLATFORM

Our Deal-making Portal has everything you need to reach out to your potential business partners and make a deal with them.

Our built-in video conferencing system and chat function facilitate negotiation and making deals while assuring confidentiality and security.

To increase your credibility, we offer expedited application of Legal Entity Identifer ("LEI") and e-cert. We also provide access to the PRC's authorities' databases via our partnering organisation Certizen to conduct background checks on PRC entities.

E-DIRECTORY

e-Directory aims to facilitate users to find business partners by industry sectors, services, products and keywords. It provides a quick grasp of the company's services and products with a brief description and connects with them with one click.

DEAL FLOW MANAGEMENT

Users can track the deal progress, create meetings, upload and download documents for business negotiation and e-sign. Our deal-flow management system also helps users monitor the progress of a deal with clear indicators.

SECURE VIDEO CONFERENCING

eBRAM's VC enables real-time transcription to provide users with a live feed of discussions displayed on the dialogue box as they happen and is equipped with a conversation transcriber that can produce a transcript in real time.

CREDIT CHECK & LEI APPLICATION

We offer expedited credit reports of Chinese companies to assist businesses in understanding their potential partners better. Besides, we assist companies in applying LEI, a globally recognised standard based on ISO 17442, helping them to enhance credibility.
